

Alpha Ink Jet

Chroma + Digital Textile Pigment Ink

Water based pigment inks for digital printing on textiles

Alpha Ink Jet

Chroma + is a new Pigment ink unlike any other. Its deep, vibrant, high definition colors are like no others seen in the industry today. Chroma + is an ink that is re-defining digital pigment printing as we know it. This revolutionary new ink couples dye-sublimation looking print quality with fastness qualities not seen before. Along with these additional advantages:

- Specifically formulated for all printers using any Epson DX, Kyocera KJ4B, and Ricoh Gen5 heads
- Prints on Natural and synthetic fabrics
- No post-treatment required
- Superior dry crock and wash fastness
- Excellent run-ability
- Increased color gamut
- Lower ink usage due to increased pigment load

Chroma + is available in 8 vibrant colors
